Driving Innovation with Big Data and IoT

Joseph Zaloker, Global Segment Leader IoT

Ken Chestnut, Global Segment Leader Big Data

November 29, 2016

Agenda

Market trends and opportunities

AWS overview

Customer examples

Partner best practices

Market trends

Previously

- Machines and intelligence centralized
- Limited connectivity
- Storage and compute expensive
- Cap ex

Now

- Machines and intelligence pushed to edges
- Ubiquitous connectivity
- Storage and compute inexpensive
- Op ex

Consequences

The market opportunity

Customer challenges

- Connecting machines and devices securely to the cloud
- Managing edge nodes and subscriptions
- Processing millions to billions of messages generated
- Storing machine data securely
- Analyzing machine data to drive business outcomes
- Combining Operations Technology (OT) and Information Technology (IT)

AWS Big Data and IoT overview

AWS provides the broadest platform for big data analytics in the market today.

Big Data

AWS IoT

Building a data lake on AWS

Global enterprise customers

Why AWS?

Eliminate costly technical debt

and reallocate resources so you can deliver high-value, revenue-generating projects faster.

Innovate faster and solidify your competitive advantage by merging startup agility with enterprise experience and resources.

Reduce risk by focusing resources dedicated to security, compliance and availability to the most important areas of your business.

"AWS is our trusted partner that is going to run our company for the next 140 years."

Jim Fowler
CIO, General Electric

SOLSTICE THE PULSE

AWS

THE PULSE

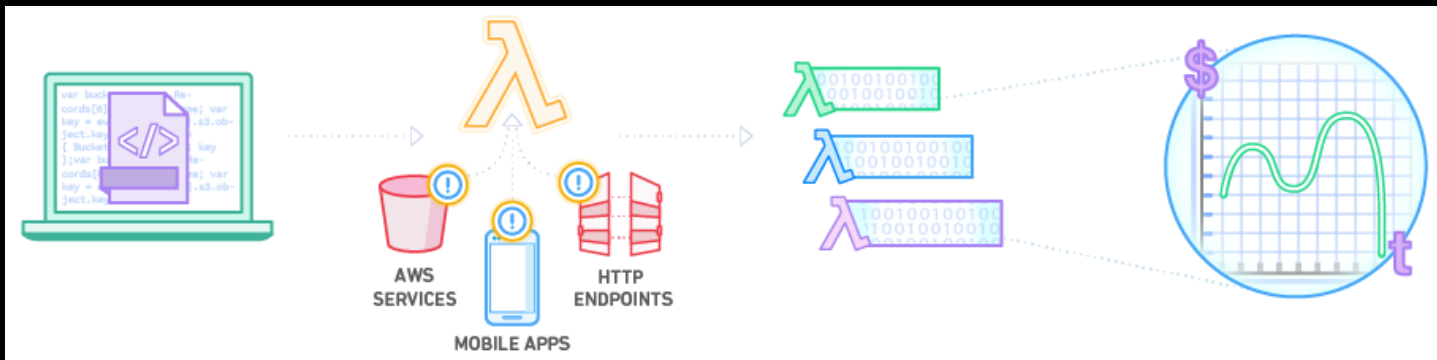

AVERAGE ACTIVITY

- AWS lets you pay for what you consume.
- Batching and local processing allows you to tailor the number of messages to your architecture use case, business need, etc.
- You can continue to process data in real-time without sending all the data to the cloud and paying for it.

Take advantage of new computing models

Serverless architectures free you from managing infrastructure

Develop without
worrying about
servers to manage

Set up your code to
run in response to a
variety of triggers

Code is executed on
demand with
continuous scaling

Pay only for the time
used with sub-second
metering

MLBAM uses AWS Lambda to support the analysis of data feeds in MLB Statcast's metrics engine. It takes the raw data, cleans it up, and conducts error detection, then creates the metrics that bring more insights into plays; all within 12 seconds of a play.

Successful AWS partners are credible and knowledgeable

- Provide an excellent customer experience
- Demonstrate expertise with training, certification, and experience
- Offer well-defined and well-architected solutions
- Provide software on AWS as SaaS, BYOL, or via AWS Marketplace
- Take advantage of the APN Portal
- Benefit from the AWS Competency Program

New AWS Partner Solutions Finder

Just launched - Partner Solutions Finder

A new platform that allows AWS customers to find the best APN partner to work with, based on customers' needs and partners' performance

Check your company's listing at <http://aws.amazon.com/partners/find> or visit our kiosks in **Sands Lower Lobby, Executive Summit** or the **AWS Booth**

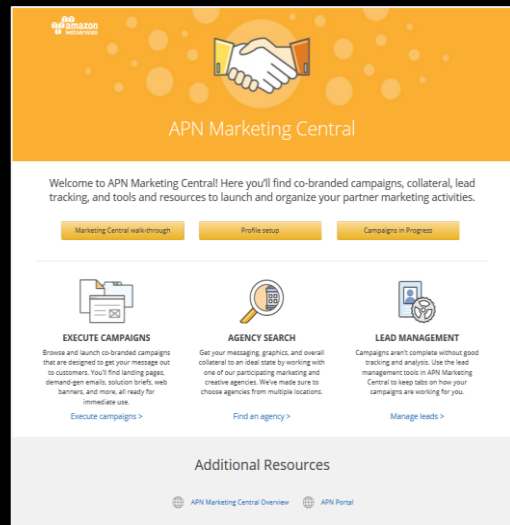

*Partner Solutions Finder will replace the existing APN Directory

APN Marketing Central

Self-service marketing tools & resources for APN Partners

- Leverage pre-made marketing assets to promote your solutions on AWS
- Search for an agency to help you execute your marketing
- Track the success of your campaigns with built-in tracking tools

APN Marketplace Update

Discover, Procure, Deploy, and Manage Software

- Benefit from AWS brand recognition
- 3,500+ software listings
- Over 1100 participating ISVs
- Open source and commercial software
- Offer try-before-you-buy options
- Procure new or Bring Your Own License
- Deployed in 12 AWS Regions
- 100,000+ active customers

The screenshot displays the AWS Marketplace interface. At the top, the header includes the 'awsmarketplace' logo, a search bar, and a user greeting 'Hello, TestBuyer29 AWSMP'. Below the header, a banner for 'Announcing SaaS Subscriptions' features logos for New Relic, sumologic, ALERT LOGIC, and TREND MICRO. A 'VIEW SAAS PRODUCTS' button is prominently displayed. The main section, 'Categories Most Often Deployed', lists eight categories with corresponding icons: Security, Networking, Storage, Business Intelligence, Databases, Dev Ops, Media, and a 'View All Categories' link. A yellow callout box on the right promotes 'Check out our expanding selection of SaaS products' with a link to 'view all SaaS products'. The footer contains a Latin placeholder sentence and the 'amazon WorkSpaces' logo. A blue banner at the bottom reads 'Get the software you need in minutes'.

Cloud computing has become the new normal

Deploying new
applications to the
cloud by default

Migrating existing
applications as
quickly as possible

AWS services more than **a million active customers** every month in 190 countries.

Through **customer obsession** and an **increasing pace of innovation**,
AWS is the **fastest technology vendor in history** to reach a **\$10B run rate**.
