SYSTEMS

Team Overview

Product Edge Systems

Playback Systems is a part of the Product Edge Systems group at Netflix. For an overview of the organization, see <https://tiny.cc/NetflixPES>.

Playback Systems Teams

Playback Lifecycle

Orchestrate every step of the Playback session. Provide stable abstractions between device and playback domains

PLAYBACK
SYSTEMS

Playback Licensing

Secure access to Netflix Content via Digital Rights Management

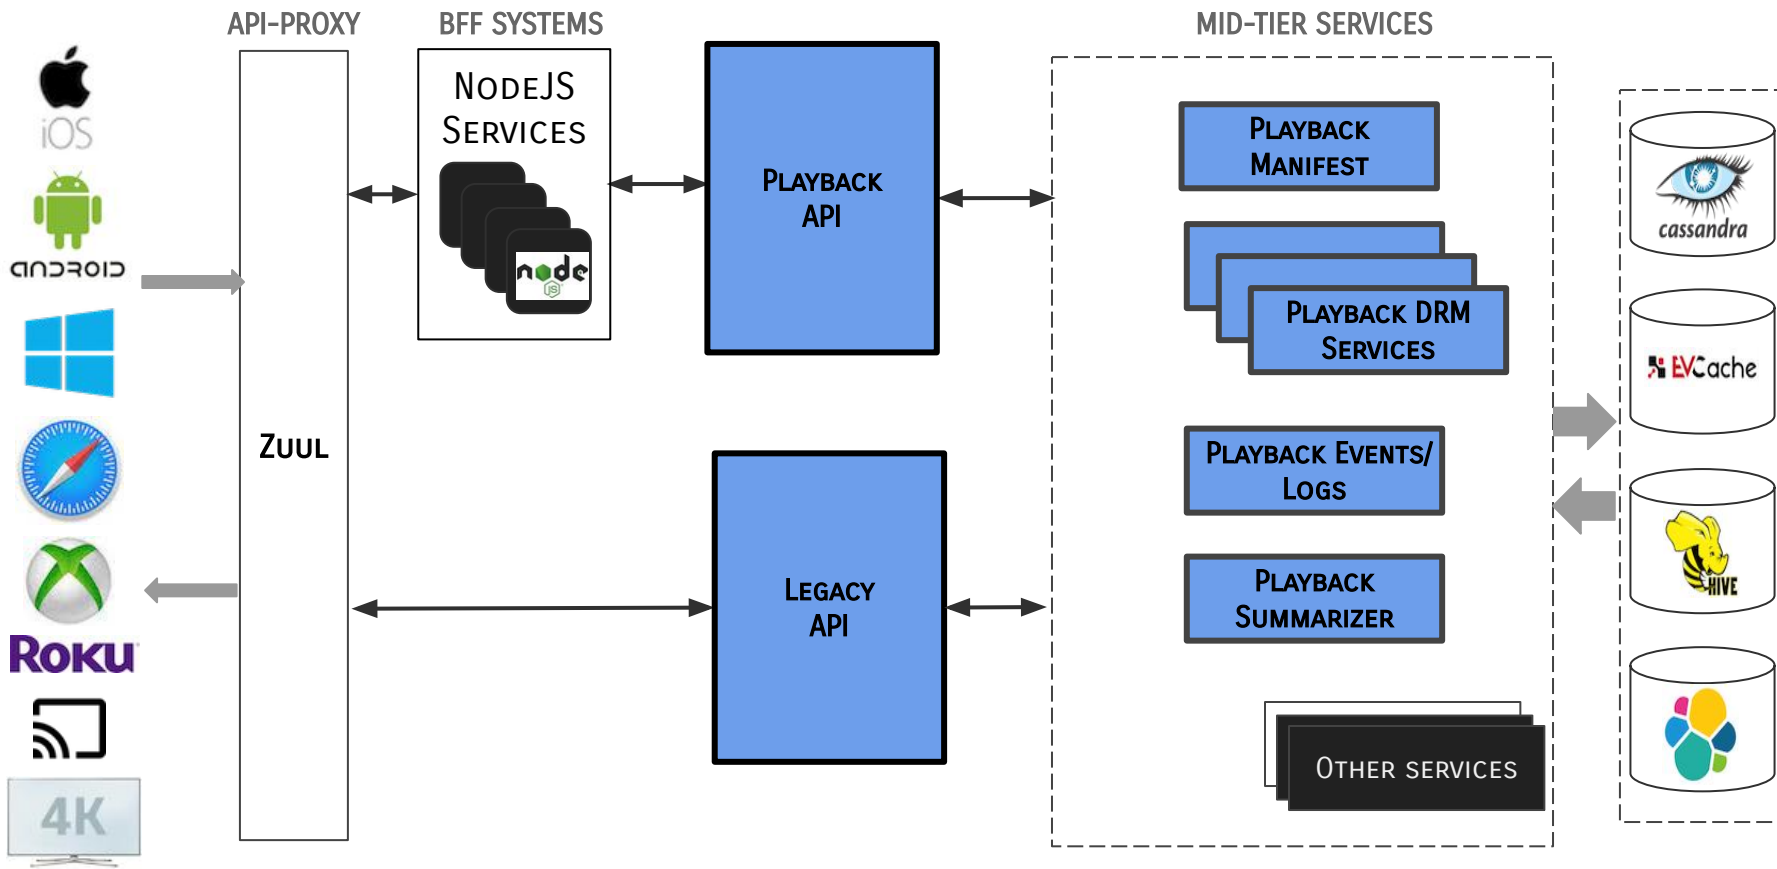

Playback Experience

Present the best personalized audio/video/text tracks for every playback

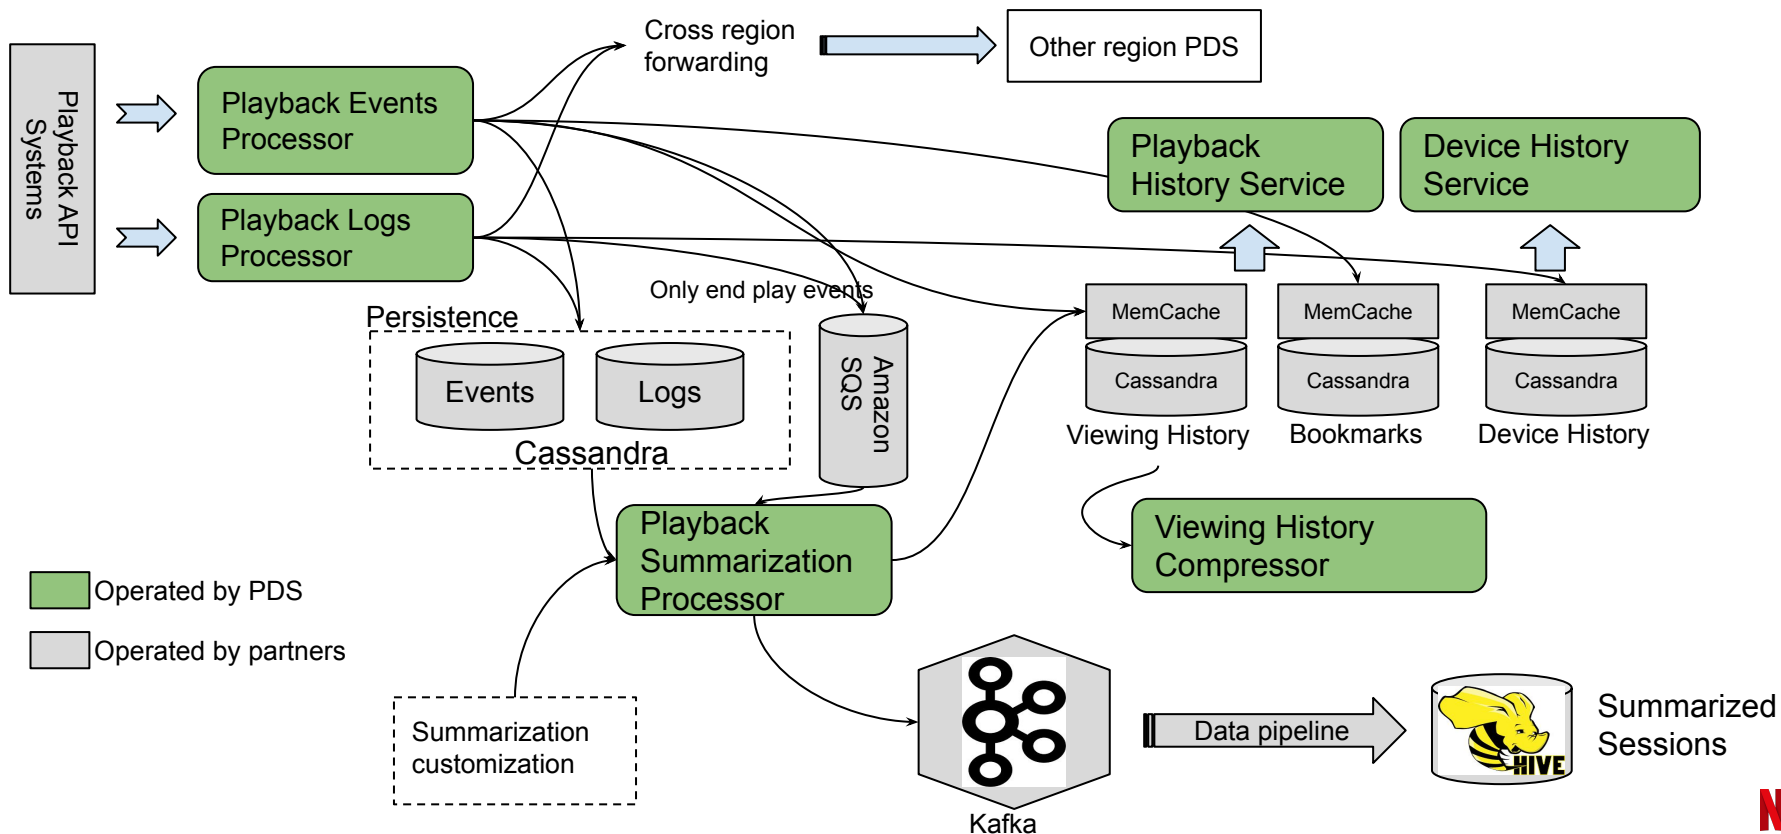

Playback Data Systems

Capture & Summarize a Playback Session. Curate and serve large scale time series data (Viewing History/Bookmarks)

Playback Systems Overall Architecture

Current Playback Data Systems (PDS) Architecture

Top 2020 Goals for PDS

1. Prototype and arrive at an informed strategic bet on the overall architecture to support our 2025 scaling needs
2. Re-imagine product specific aggregated materialized views for Viewing History dataset
3. Achieve Simplicity by streamlining our Session Processing and Summarization architecture
