We start with the customer

We take on the big challenges they have

We innovate

We start with the customer... and innovate

Customers told us...

Managing databases is painful & difficult

SQL DBs do not perform well at scale

Hadoop is difficult to deploy and manage

DWs are complex, costly, and slow

Commercial DBs are punitive & expensive

Streaming data is difficult to capture & analyze

We created...

✓ Amazon RDS

✓ Amazon DynamoDB

✓ Amazon EMR

✓ Amazon Redshift

✓ Amazon Aurora

✓ Amazon Kinesis

AWS Data
Pipeline

**What are the big data challenges
our customers face?**

How is my marketing campaign performing?

Which devices are showing time for maintenance?

Why is my most profitable region not growing?

Who are my top customers and what are they buying?

Lots of data

Lots and lots of questions

Few insights

How much inventory do I have?

How is my employee satisfaction trending?

What is my product profitability by region?

Has my fraud account expense increased?

Old-guard BI

Costs Too Much

Pay \$ million before seeing first analysis
3 year TCO \$150 to \$250 per user per month

Takes Too Long

Spend 6 to 12 months of consulting
and SW implementation time

Cost

Old-guard BI

Slower performance at scale

Doesn't deliver fast query performance

Requires 6 to 12 months of consulting

Pay \$ millions for license and hardware

Time

**Freedom to get the real value
out of the data you have**

Introducing Amazon QuickSight

**A very fast, cloud-powered, BI service for
1/10th the cost of old-guard BI software**

\$9

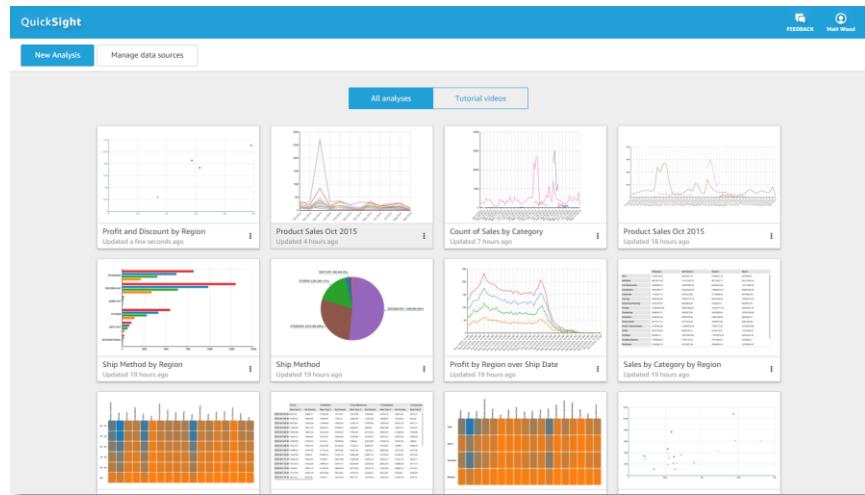

per user per month

With 1 year commitment

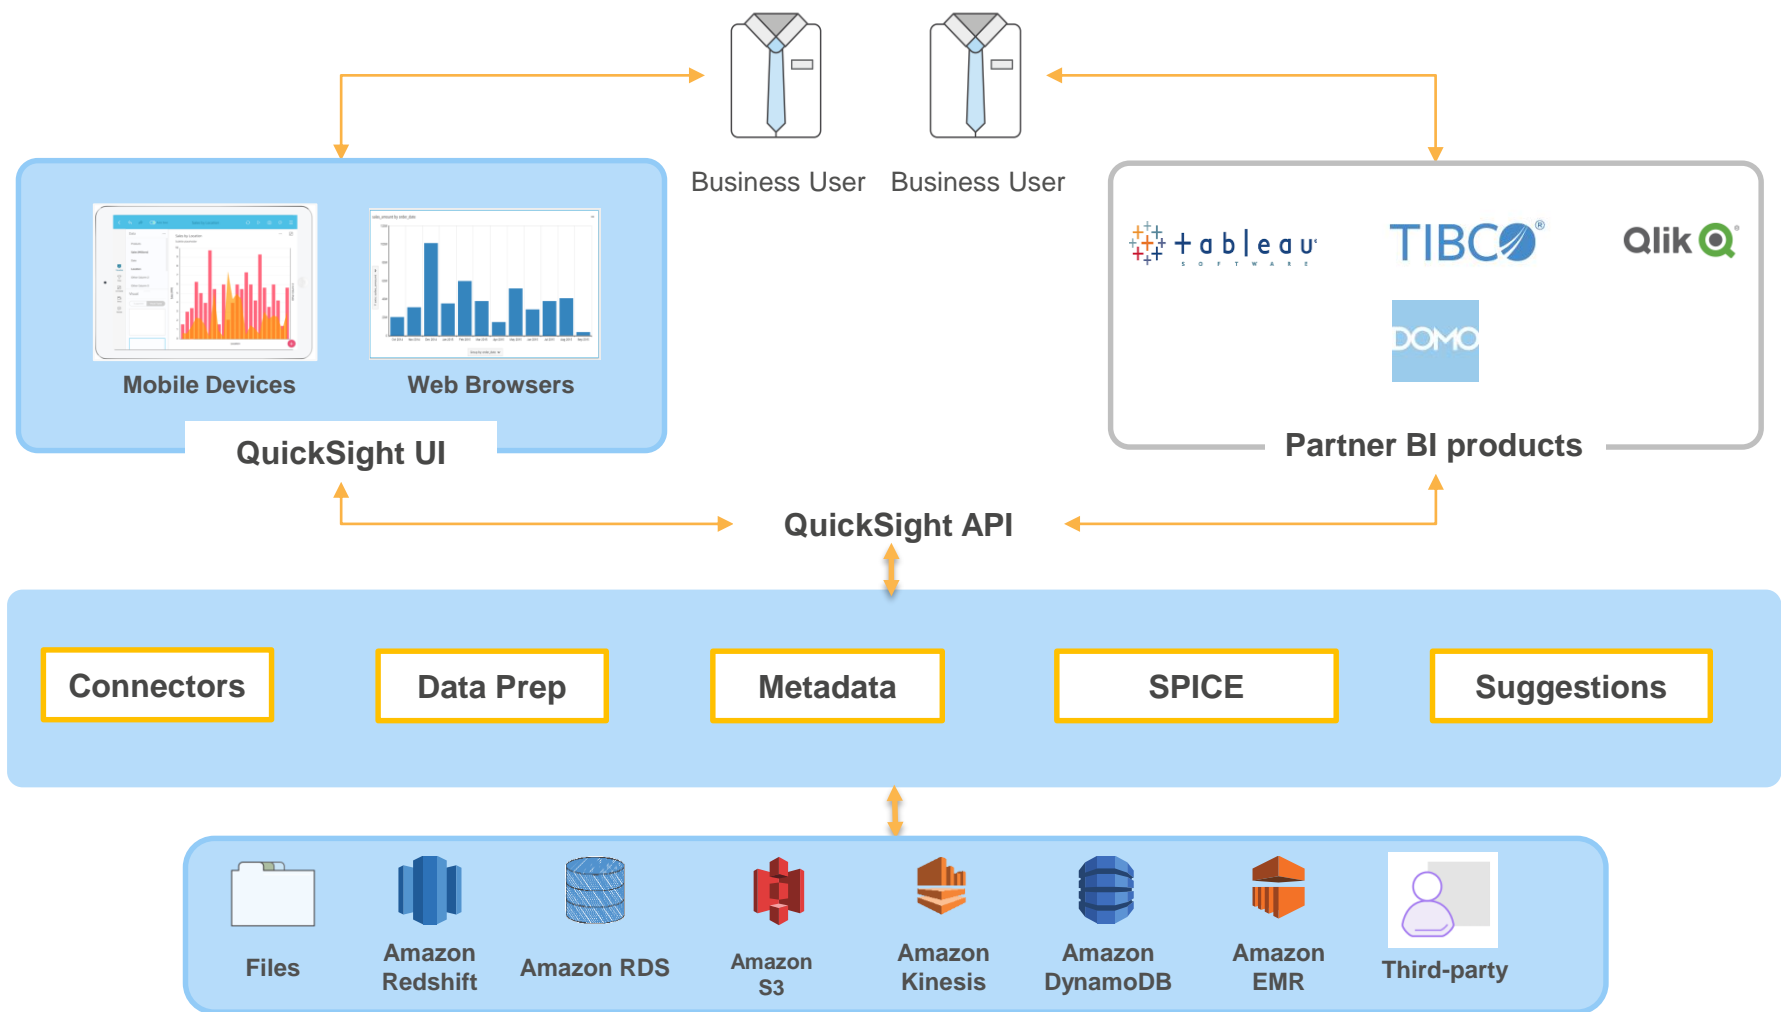

First analysis in about 60 seconds

Business user

Register for preview beginning Oct 7 at aws.amazon.com/quicksight

Innovations

Easy exploration of AWS data

Fast insights with SPICE

Intuitive visualizations and transitions (AutoGraph)

Native mobile experience

Secure sharing and collaboration (Storyboard)

How do I SPICE up my data?

DATA SOURCES

*Connect to AWS data services;
upload files; or connect to apps
such as Salesforce*

IN-MEMORY CALCULATION ENGINE

*The Super-fast, Parallel, In-memory, Calculation
Engine ("SPICE") generates answers on large
datasets and returns rapid responses*

QUICKSIGHT UI

*SPICE allows for very fast analysis
and smart visualizations for
sharing and collaboration*

Easy exploration of AWS data

Amazon EMR

Amazon Kinesis

Amazon DynamoDB

Amazon Redshift

Amazon RDS

Amazon S3

File Upload

Third Party

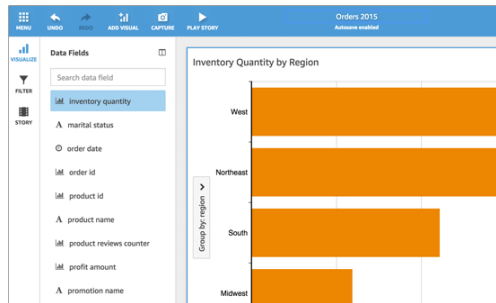

- Securely discover and connect to AWS data
- Quickly explore AWS data sources
 - Relational databases (Amazon RDS, Amazon RDS for Aurora, Amazon Redshift)
 - NoSQL databases (Amazon DynamoDB)
 - Amazon EMR, Amazon S3, files (CSV, Excel, TSV, XLF, CLF)
 - Streaming data sources (Amazon DynamoDB, Amazon Kinesis)
- Easily import data from any table or file
- Automatic detection of data types

Fast insights with SPICE

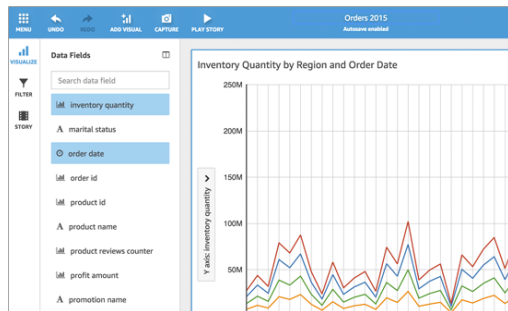

- **S**uper-fast, **P**arallel, **I**n-memory optimized, **C**alculation **E**ngine
- 2 to 4x compression columnar data
- Compiled queries with machine code generation
- Rich calculations
- SQL-like syntax
- Very fast response time to queries
- Fully managed – No hardware or software to license

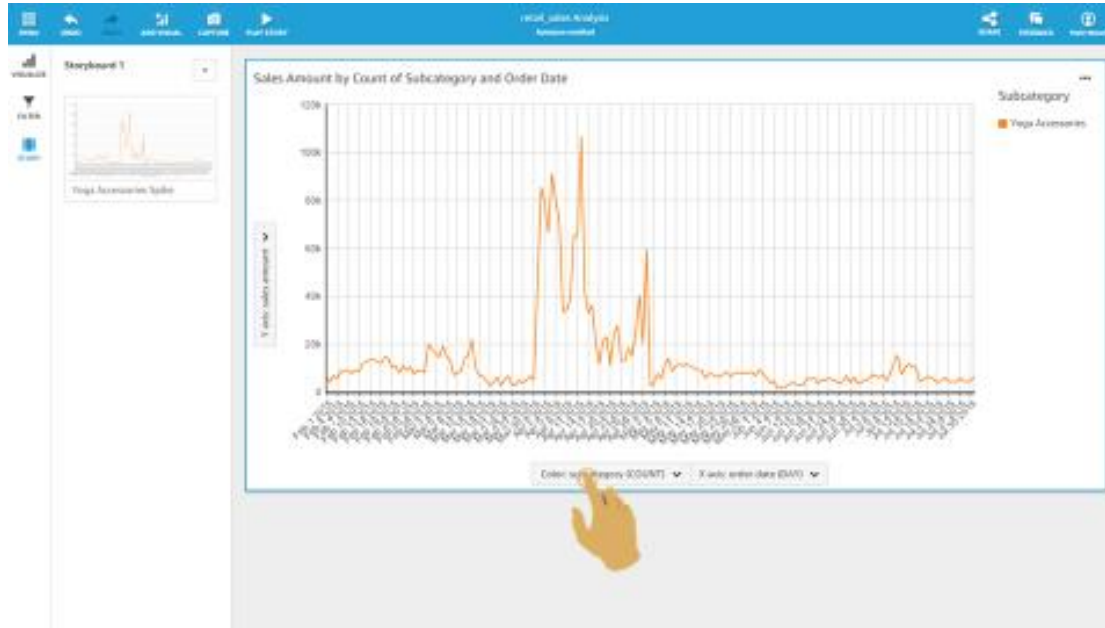

Intuitive visualizations with AutoGraph

- Automatic detection of data types
- Optimal query generation
- Appropriate graph type selection
- Ability to customize the graph type
- Very fast response

Native mobile experience

- iOS, Android
- Full experience on tablets
- Consumption experience on smart phones
- Very fast response

Tell a story with your data

- Capture the critical snapshot of analysis
- Build a sequence of analysis
- Share it securely
- Enable interactive exploration
- Very fast response

Fast to get started

Easily explore any AWS data

Fast insights with SPICE

Easy to use and share

Effortless scale

Low cost

Low cost

Standard Edition

Ad-hoc analysis, data connectors,
sharing, embedding, mobile experience
+ 10 GB of SPICE storage

\$9

Per user per month

1/10th the cost of old-guard BI

Enterprise Edition

Standard Edition + Active Directory
integration, user access control, encryption
at rest, 2X throughput

\$18

Per user per month

Pricing details

	<u>Standard Edition</u>		<u>Enterprise Edition</u>	
Subscription	Annual	Monthly	Annual	Monthly
Price per user per month	\$9	\$12	\$18	\$24
SPICE Capacity (GB)*	10	10	10	10
Additional SPICE GB-month	\$0.25		\$0.38	

** Per user SPICE capacity is pooled across all users in an account. As an example, a customer with 100 user subscriptions will get 1,000 GB of SPICE capacity for the account.*

**Freedom to get the real value
out of the data you have**

**Remember to complete
your evaluations!**

The logo for AWS re:Invent is centered at the top of the slide. It features the word "AWS" in a small, black, sans-serif font. Below it, the word "re:" is in a larger, orange, sans-serif font. To the right of "re:", the word "Invent" is in a very large, bold, black, sans-serif font. The background of the top section is a light blue and white pattern of overlapping geometric shapes, including lines and squares, creating a sense of depth and connectivity.

AWS
re:Invent

Thank you!
